ShareChat PRIMA Dataset

The audio files and corresponding annotations of PRIMA are included in this download.

The annotation folder contains the train and test splits used in our paper for all the languages in the csv format.

Each row of the csv contains the name of audio file and ground-truth indicating the presence of profanity.

For ex. “Hindi_train.csv” and “Hindi_test.csv” contains train and test data for Hindi language. Each row of this file has the name of audio file and its label.

Labels “Yes” and “No” represent the presence and absence of profanity in the audio file.
